Presidents Plug The weather was very to us on February 1st and 2nd and a lot of members took advantage of it. We had about 10 or 15 flyers out both days. Sunday the first was the best of the two days with temperatures in the mid 60's and calm winds. Good turn out.
The Club is in need of some volunteers to put on demonstrations and/or tech talks at the meetings to help members understand some of the techniques and short cuts used in building, such as fitting

cowling to aircraft, aircraft balance, covering etc.
Some topics to be discussed at the next meeting will be the possibility of meetings at the field in the summer months and BBQ's at those meetings. Attend and throw in your two cents. I would also like to thank Mike Lucido for his help as a board of director member. Mike's job is transferring him out of town. Thanks again Mike.
See you all at the meeting on February 20, 2003.

Airplane Cleaner:

5 cups water
1/2 cup of ammonia
1 cup rubbing alcohol
1 oz. of DAWN dish detergent

Mix all ingredients in a clean milk jug, pour enough in a small spray bottle for field use. This solution cuts thru the oil buildup on the underside of your plane and leaves it squeaky clean.
