The field looks great, the flying season is drawing to a close, I hope those of you who have not had the opportunity to use the field will do so soon. It's that time of year to start thinking of who next year's officers will be. I know we'll get some excellent candidates! Hope to see you at the meeting

Airplane Cleaner:

5 cups water
1/2 cup of ammonia
1 cup rubbing alcohol
1 oz. of **DAWN** dish detergent

Mix all ingredients in a clean milk jug, pour enough in a small spray bottle for field use. This solution cuts thru the oil buildup on the underside of your plane and leaves it squeaky clean.

Caution: Dawn seems to be the only dish detergent that cuts all the oils and doesn't leave a residue on the plane.

Scout Kevin Saddler with the starting stands.

Dan Deirking with his Eflight Blade electric helicopter.

John Rawlings Dual ACE with 2 OS 46 engines and 8 Servo's

Editors Note

This past Thursday September 14th the field was buzzing with airplanes as a group of members and guests came out to fly. Christy spent three hours the day before rolling the field using a roller we borrowed from the St Charles Saints RC Club. The runway is good shape. There are still a few rough spots but with a little more rain and some more rolling it will be perfect. The corn is down and you can see for miles. Be careful and not let your plane get out to far so you don't loose it. Let us all try and build the friendliest club around and remember this is a hobby and everyone should enjoy it. But keep in mind it does cost money to have a great field and try to recruit the guests we bring out to fly.
